

ERIKS Seals and Plastics Announces New Technology Center

Roseville, CA September 1, 2016 - ERIKS, an international industrial service provider offering a wide range of high-quality mechanical engineering components, is pleased to announce the opening of its newest facility in Roseville, California. The new facility will replace the current Technology Center facility which is located in Rocklin, California, increasing the square footage by over 25%.

“Our customers come to us because they need more than just a supplier,” said Shawn Courtney, President of ERIKS Seals and Plastics. “They want a long-term partner that can offer the flexibility and agility of a distributor with the technical knowledge and abilities of a manufacturer and ERIKS has been doing just that for over 75 years.”

Greg Pfister, Director of Technology for ERIKS Seals and Plastics said, “We are excited about this new facility as it will enable us to accommodate new testing, analysis and prototyping capacity that allow ERIKS to continue to support leading edge development projects that solve the most difficult materials and sealing issues our customers face.”

Located on Galilee Road in Roseville, CA, this new facility will accommodate the existing engineering staff as well as allow for additional staff in the future. The office phone numbers and email addresses will remain the same.

About ERIKS

ERIKS was founded in 1940 in Alkmaar, Netherlands. Today, ERIKS is a leading provider of a wide range of high-quality mechanical engineering components and associated technical and logistics services.
