

ERIKS NORTH AMERICA

Local Presence. Global Resources. **Infinite Possibilities.**

Know-How Makes the Difference

ERIKS is an international industrial service provider offering a wide range of high-quality mechanical engineering components and associated technical and logistics services. Vast market knowledge, in combination with strong customer relationships, keeps ERIKS on the forefront of our customers' needs. With an experienced and diverse technical staff, ERIKS can aid in product selection as well as product development. Our goal is to partner with our customers to help them develop innovative and sustainable solutions, and cut costs through technology, operations excellence and a strong customer focus.

Core Products and Services

Sealing Technology

INDUSTRIAL SEALING • INDUSTRIAL PLASTICS

ERIKS is a world leader in high-performance O-rings, elastomeric and polymer seals. Our focus on your markets and passion for technology helps us to engineer new solutions for your applications and has established ERIKS as the know-how team.

Flow Technology

VALVES • HOSES • GASKETS • INSTRUMENTATION

Every day at ERIKS, we renew our commitment to a culture of continuous improvement in the engineering, design and manufacturing of high-performance valves, gaskets, instrumentation, hoses, couplings, fittings and expansion joints.

Expanding Markets and Capabilities

Building on decades of success and growth in the European market, ERIKS began expanding into North America in 1988. Since that time, ERIKS has grown our operations in North America, becoming a market leader in sealing technology and flow technology. The ERIKS North American operations include five companies with 185 combined locations, dedicated to serving a diverse range of industries that require high-performance solutions for use in demanding applications.

ERIKS North America Companies

Company Profile

Lewis-Goetz is the leader in mission critical hose, sealing, and belting products that keep businesses running. We understand our products provide a vital link in the chain of production. The proper recommendation and use of these critical products ensures the safety, productivity, and profitability of our customers. That is why the phrase “We Keep You Running” is more than just a slogan to us. It articulates our understanding of the difficult day-to-day reality our customers face and our deep commitment to be there as a dependable and trusted partner in production. It’s a promise we keep everyday for thousands of customers all across the nation.

At Lewis-Goetz and Company, we set ourselves apart by developing our core strength of internal capabilities. All of our products are backed by our commitment to quality, service and true dedication to offer a complete product management program. We offer a complete line of products in each of our three main categories; hose, conveyor belt and sealing products. Within each product line you will find knowledgeable employees who can help you find products to fit your needs. We also offer services in each category including surveys, testing, tagging, system maintenance, belt repairs and splicing, to name a few. At Lewis-Goetz we have invested in stocking what you need, where you need it.

- Agriculture

Valves Instrumentation Filtration & Control Products

Company Profile

Rawson, Inc., founded 1954 in Houston, TX, has grown to be the premier instrumentation, valve and controls distributor in the Gulf Coast of the United States. Rawson has branches throughout Texas, Louisiana, Oklahoma and Mexico and recently expanded its geographic coverage to include the Southeastern United States by virtue of its acquisition of Regal-Brown Incorporated, a well-respected supplier of industrial controls and filtration products.

Premier Products

Rawson's strength comes from the diversity of products we have come to represent over the years. Primary to our growth has been our ability to attract highly regarded and top rated manufacturers into its product portfolio, thereby establishing Rawson as the "one stop source" for instrumentation and valve related products. Customers throughout the territory recognize that Rawson is a valuable partner in their quest to get maximum value from their supplier network.

Outstanding Service Capabilities

With 17 stocking locations in Texas, Louisiana, Oklahoma, and Mexico, Rawson believes in putting inventory and technical support close to our customer base. Every Rawson location has a highly trained sales staff ready to answer questions and provide technical support to customers located in their region. The inventory maintained at each Rawson location is specific to the needs of the customers served by the branch, which further enhances Rawson's dedication to outstanding customer service.

Company Profile

Industrial Controls is a full service distributor of controls and solutions for commercial HVAC, process control and industrial automation applications. Our extensive product portfolio and technical expertise uniquely qualify us to offer custom solutions to meet your specific needs.

Our knowledge of processes and what it takes to successfully manage them makes it natural for us to be more than just application experts. Our customers view us as the people they trust to integrate controls with their equipment and ensure the successful achievement of their project goals. Our increased involvement has built our portfolio of experience, so that we can now provide multiple references for successful integration of systems for process automation, manufacturing automation and building automation.

Partners in Your Success

Industrial Controls was founded on leadership, expertise and our focus on building lasting customer relationships. We strive to be a market-focused organization that delivers quality products, forward-thinking solutions and measurable value to our customers.

Industrial Controls has developed a wide range of core competencies that are a perfect match to our broad range of high-quality products. This enables our customers to view Industrial Controls as a strategic partner and extension of its own organization's commitment to innovation, efficiency and productivity.

Company Profile

ERIKS Seals and Plastics is a leading technical source of seals, engineered plastics and bearings for demanding applications. We provide our customers with the unique combination of product and material expertise and efficient logistics solutions. Our passion for technology has helped transform virtually every market in which we operate.

Vast market knowledge combined with strong customer relationships keeps ERIKS on the forefront of your industry's needs. With a diverse and experienced technical staff, ERIKS can aid in product selection as well as product development. Our goal is to partner with our customers to help them develop innovative and sustainable solutions, as well as cut costs through technology, operations excellence and a strong customer focus.

Smith
PK

Company Profile

The Newdell Company is a manufacturer and wholesaler of industrial valves used in the petrochemical, chemical, and refinery markets. Newdell markets two product lines; Smith and PK valves.

SMITH manufactures and distributes a wide range of intricately engineered Gate, Globe, Piston, and Ball Check forged steel valves for high pressure and high temperature applications. SMITH has been the industry leader for over half a century.

PK valve is an industrial valve manufacturer with product development, design, modeling, casting, machining, assembly, testing, inspection, painting, and packaging since 1946. PK valves are exclusively distributed in North and South America by the Newdell Company.

Diamond Gear
Air Torque

Company Profile

Diamond Gear Company, Ltd. is a manufacturer of industrial worm gears, bevel gears, and declutchable worm gears. Additionally, Diamond Gear Company, Ltd. is the North American agent and master distributor for the Air Torque Power Technology line of pneumatic rack and pinion actuators.

Diamond Gear manufactures motorized and manual gear boxes for use with all types of quarter and multi-turn industrial valves. Gears are supplied to valve manufacturers, valve automation facilities and repair/modification centers.

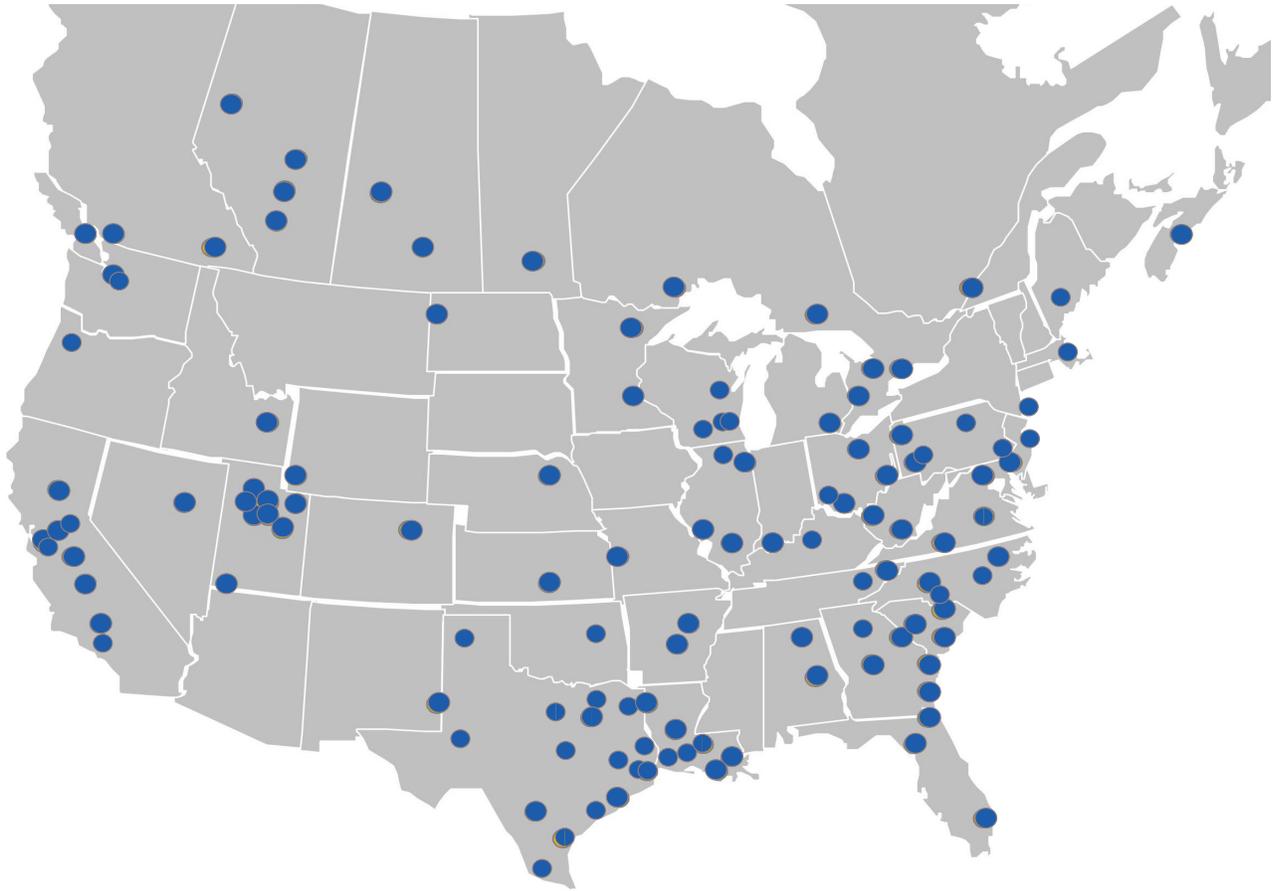

AIR TORQUE

Air Torque is the recognized industry leader in pneumatic rack and pinion actuators. With a modern facility in Bergamo, Italy, Air Torque produces over 28K units per month. The Air Torque brand is globally recognized for its quality and long-term performance.
